

HUNT TRIP SPAIN

Enjoy the Finest Partridge Shooting in Spain

The Spanish Red Legged Partridge is considered by many as the most sporty bird in the world. It is a beautiful bird with morphological characteristics that make it a fast, acrobatic flyer. Every year, thousands of hunters travel far and wide to enjoy the challenge of shooting Red Legged Partridge in Spain.

The driven hunts (ojeos) can fit a line up to 8 hunters. Typically there are four drives a day, averaging 400 Partridges per day. This type of driven hunt is part of a rich tradition in Spanish culture. Our driven hunts are designed to test the wing shooters' acumen and to showcase the Red Legged Partridge's incredible agility.

While in the blind, you are assisted by a personal loader (Secretario) promoting a collegial atmosphere. The shooter is always protected by steel screens, and the Secretario retrieve the birds.

Red-Legged Partridge

We use 4WD vehicles for transportation to the shoot. Lunch is typically served at the lodge but, weather permitting, it can be enjoyed in the field. Drinks and snacks are always served in the field.

The Spanish countryside offers pristine and colourful scenery. Some winter days may be chilly but layering with a good shirt, a light sweater and a shooting vest is the preferred way to dress while hunting.

We look forward to sharing this unique wingshooting experience with you!
